

When it Comes to Reducing Temperatures, ProOne Knows the Drill

ProOne's exclusive XPL+ technology is designed to reduce heat and friction under the most extreme conditions ... intense heat, high pressure, mud, water ... which is why this drilling slurry additive has been proven to offer extraordinary results in downhole drilling operations. And it's biodegradable!

BOTTOM LINE BENEFITS:

- Over 70% reduction in friction
- Increases lubrication of the drill mud
- Reduces wear to extend drill bit life
- Greater reliability - less down time
- Increases production
- Reduces torque
- Eliminates up to 94% of electrolysis
- Lowers operating temperatures
- Displaces moisture to prevent corrosion

EARTH FRIENDLY:

- Biodegradable!
- No diesel fuel added to well
- Reduces hazardous products
- Safe for human contact
- No increase in disposal hazards

ProOne #	SIZE	CASE PACK
23001	1 gal/3.785L	4
23005	5 gallon/18.9L pail	1
23055	55 gallon/208L drum	1
